

Landfill Diversion

260,000
tons of MSW processed

Enough to fill
12
White Houses

Or
31,100
garbage trucks,
bumper to bumper

Energy Recovery

118,000
MWh net electricity export

Enough to power
11,000
homes for 1 year

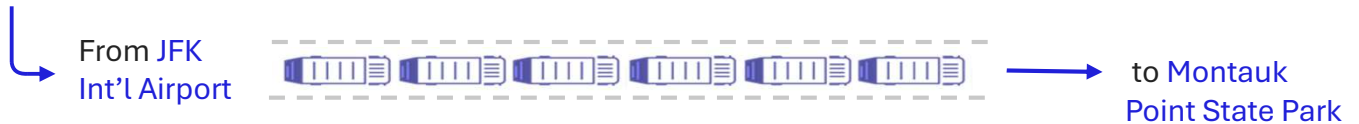

Or, charge
27,000
Electric vehicles
for 1 year

Metal Recycling

9,800
tons of ferrous metals

Equivalent to:
8,000
cars recovered
from steel

Paperclip chain
wrapped around
the earth
15 times

Net Greenhouse Gas (GHG) Avoidance

2.3 tons
of net CO₂e avoided*
for every ton of waste
diverted from landfill

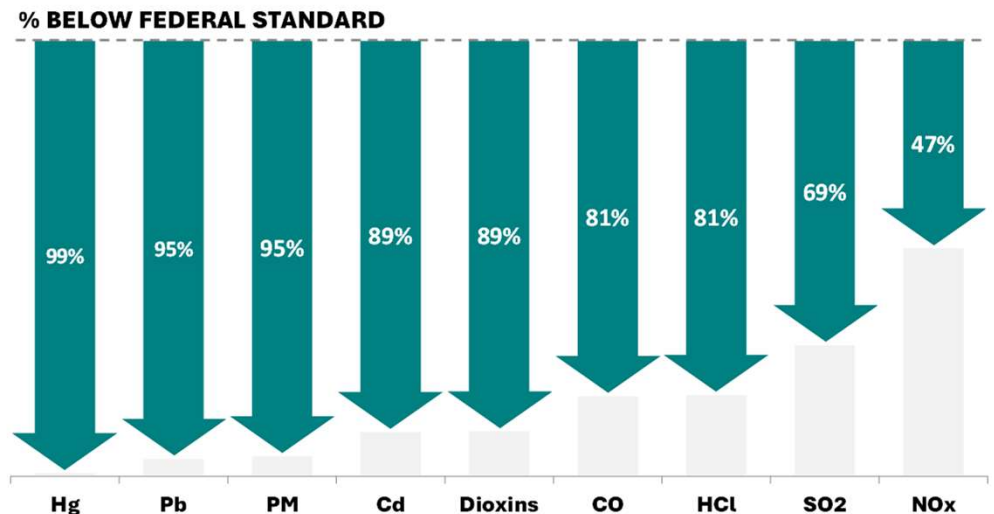

543,000
metric tons of
GHGs avoided

Equivalent to removing/displacing:
133,000 Vehicles
from roads
670M Pounds of
coal

Environmental Compliance

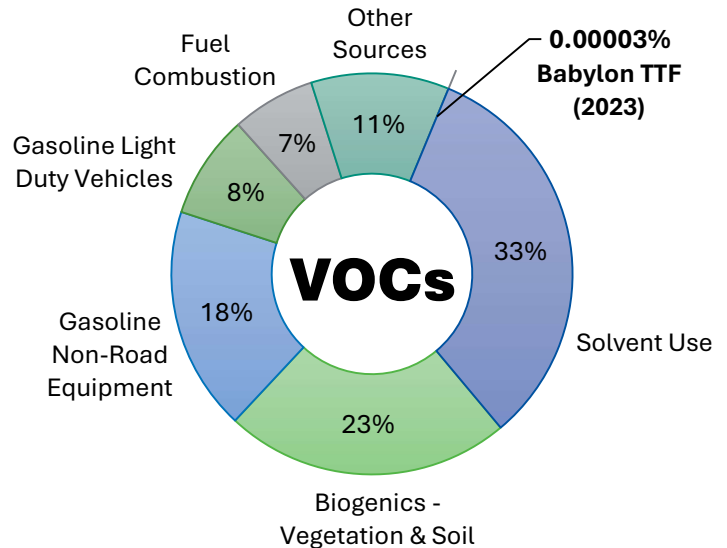

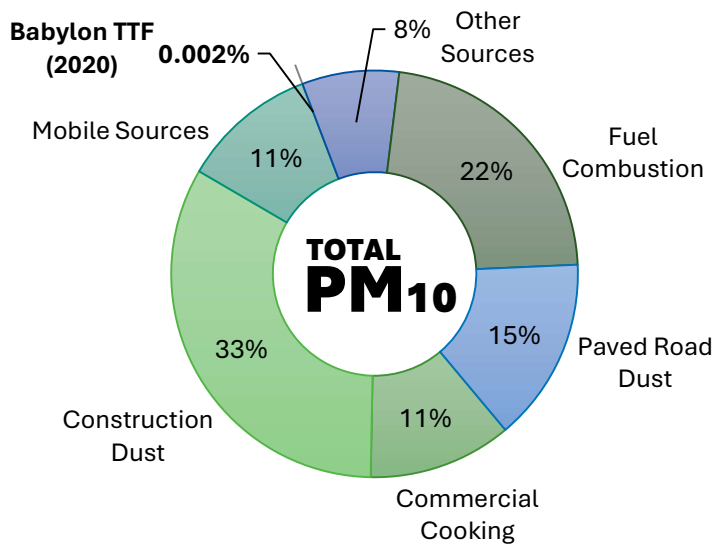

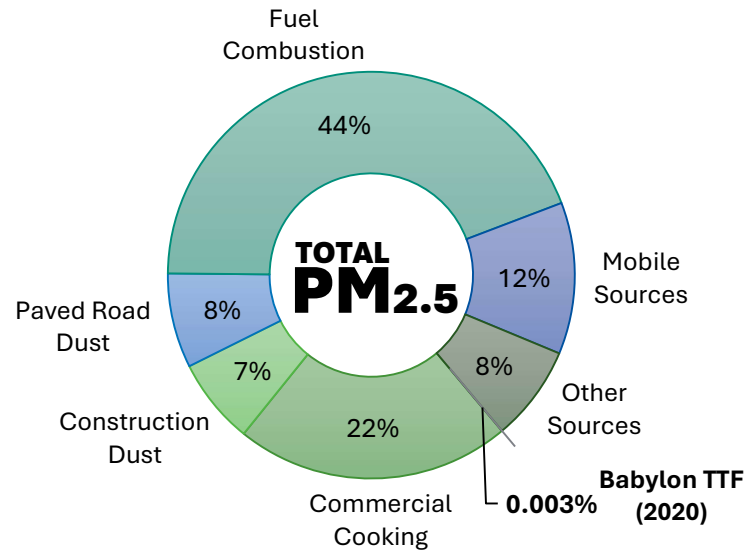

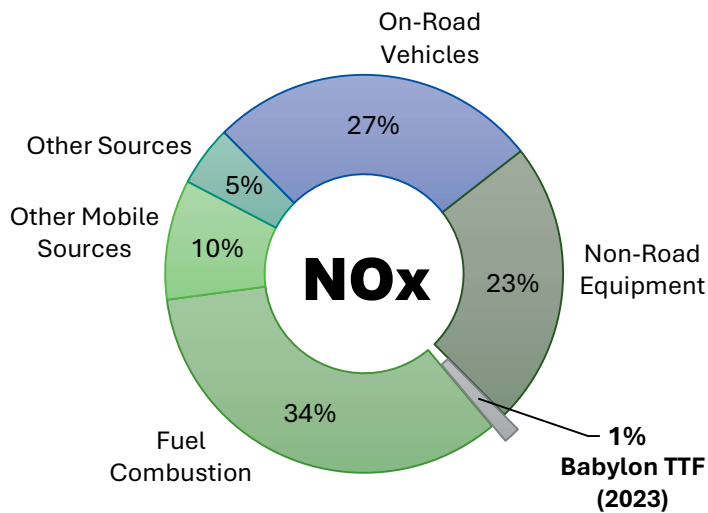

up to
99% below
Federal emissions
standards, based on
annual averages**

100%
compliant
with Continuous Emissions
Monitoring (CEMS) standards

How Do Our Emissions Compare to Other Sources in the County?

Local air emissions^{***} in Suffolk County, NY

* GHGs are represented in CO₂ equivalents (CO₂e) using global warming potentials (GWPs) to compare the warming power of different gases. This analysis uses the 20-yr GWP for methane of 81 from the IPCC's 6th assessment report. TTFs in the U.S. reduce lifecycle emissions by an average of 2.4 tons of CO₂e per ton of MSW diverted from landfills. The data presented here reflects facility-specific operating data and the local electrical grid, which can differ from the national average.

** 2021-2023 Average Annual Emissions compared to federal guidelines for existing facilities (40 CFR 60 Subpart Cb). Facility may be subject to more stringent requirements by permit or in accordance with other federal guidelines.

*** Based on the 2020 US EPA National Emissions Inventory; the most recently released complete inventory. Where available, the facility's 2020 emissions were replaced with the most recently reported 2023 emissions.
