

Health & Safety Policy

Health & Safety is the ongoing integration of safety and health into all activities with the objective of preventing illnesses and injuries and continuously improving performance.

Nothing is more important than safety and health; not production, not throughput, not profits.

Incidents, illnesses and injuries are preventable, they are not inevitable.

Health & Safety is a leadership responsibility and safety and health can be managed.

Working safely is an individual responsibility and a condition of employment.

Health & Safety is a way of life, around the clock, both on and off the job.

Every task must be performed with a concern for health & safety for ourselves, our fellow employees, our contractors, our visitors, our customers and the communities in which we operate.
