

Industrial & Field Remediation Solutions

Industrial sites and equipment need cleaning and maintenance, sometimes unexpectedly.

Through our industry-leading network of experts and capabilities, we reliably prevent and respond to remediation challenges of any makeup or magnitude.

- > A vast fleet of fully licensed tanker, box and vacuum trucks; ample equipment rental options; and strong industry partnerships
- > Emergency response, field, onsite and specialty service options for soils, sludges, chemicals and more
- > Tank, railcar, pit, lagoon, pipeline cleaning; vacuum, line jetting, dewatering and remediation services; industrial maintenance
- > Complete management of permitting, insurance, licensing, invoicing, downstream verification and other essential paperwork
- > Discreet, reliable and transparent service tracking, reporting and insights, alongside a digital portal for streamlined management

Benefits

Ensure preventative and responsive services—such as site evaluations and waste profiling, emergency remediation and pump-outs, wastewater and hazardous waste treatment—keep operations functioning as expected, offering:

Safety – Waste is carefully and completely cleaned up and transported for processing, diverting hazards that harm ecosystems, threaten communities and negatively impact plant, animal and human health

Compliance – Waste, equipment and sites are thoughtfully and thoroughly managed and documented in accordance with all local and federal regulations, preventing violations that impede strategies, halt operations and revoke licensing

Sustainability – Waste is efficiently and environmentally removed; treated and reused, recycled, turned into fuel or energy; or safely returned to nature as raw components, creating cycles that optimize resource value, reduce carbon footprints and regenerate ecosystems

The Reworld™ Difference

A nation-wide network of technology, facilities and partnerships

Decades of experience from world-class experts, industry leaders and innovators

Trailblazers in environmental justice, sustainability-linked financing and circularity

Transparent, accessible and centralized communication, reporting and insights

Reliable and comprehensive account management, service and support

End-to-end sustainable solutions that drive financial and environmental goals
