

Resource Reuse & Recycling Solutions

Repurposing resources isn't just environmentally sound; it's economically prudent too.

We'll help you discover new revenue streams, conserve resources and drive efficiencies, improving your bottom line alongside your carbon footprint.

- Complete depackaging and recycling of food items, cleaning products and other goods and their containers
- Efficient treatment and recycling of wastewater, oils, gases and fuels from a wide scope of simple and complex sources
- Thorough deconstruction and recycling of electronic devices, universal waste items and other sensitive and high-risk materials
- Ample material resale options that generate new revenue streams and reduce dependencies on virgin resources
- Discreet, reliable and transparent profiling, service tracking, reporting and insights

Benefits

Ensure the resources in your waste materials—such as metals, plastics, paper, oils, gas, foams, water, fabrics, textiles, and more—are innovatively reused and recycled, offering:

Sustainability – Waste is efficiently and environmentally treated and reused, recycled or safely returned to nature as raw components, creating cycles that optimize resource value, reduce carbon footprints and regenerate ecosystems

Profitability – Waste is effectively and economically separated into recoverable components, utilizing resources that offset raw material costs, can be sold for new revenue and spur material rebates

Assurance – Waste is diligently and discreetly rendered unrecoverable, mitigating liabilities that compromise privacy, expose intellectual property and impact brand reputation

The Reworld™ Difference

A nation-wide network of technology, facilities and partnerships

Decades of experience from world-class experts, industry leaders and innovators

Trailblazers in environmental justice, sustainability-linked financing and circularity

Transparent, accessible and centralized communication, reporting and insights

Reliable and comprehensive account management, service and support

End-to-end sustainable solutions that drive financial and environmental goals
